September 2015 — September 2019

- Delivered superior and consistent customer experience.
- Achieved and exceeded sales targets.
- Managed staff responsibilities and store organizations.
- Handled customer issues and concerns.

Personal Projects

Through the Woods
throughthewoods.netlify.app

- A personal blog app that tracks and highlights discovered hikes across Canada.
- Built using NextJS with Chakra UI, Strapi CMS backend with MongoDB and Cloudinary.
- Authorized users can create, read, update, and delete trail entries.

Experience Rally
experience-rally.netlify.app

- Built with create-react-app, styled with SCSS and animations from Framer Motion.
- A front-end focused ecommerce-based website that offers three subscription services for live rally races.
- Contains a hero page, subscription page, checkout page and confirmation page.

Homepage
jc-homepage.netlify.app

- Built using GatsbyJS static site generator for ReactJS and styled with SCSS.
- A personal homepage with dynamic features like personalized greeting, weather, and random quotes.
- Homepage data is retrieved using Openweather API and Random quote generator API.

Portfolio Site
jeremiahcanlas.com

- Revised my portfolio from an HTML file to a React app using GatsbyJS and Styled Components.
- Styled with SCSS and animations from react-reveal
